L5 ANSWER 1 OF 3 MEDLINE on STN

L5 ANSWER 2 OF 3 CAPLUS COPYRIGHT 2003 ACS on STN

AB 16.alpha.-Hydroxyprogesterone-4-14C (I) was obtained from an incubation of progesterone-4-14C with sow ovaries by the method of Warren and Salhanick (CA 56, 7926d) and further incubated with sow ovaries. Estriol was identified by paper chromatography of the free alcohol, the acetate, and the 3-methyl ether. The conversion was 1-2%. 16.alpha.-Hydroxyandrost-4-ene-3,20-dione and 16,20-dihydroxyprogester-4-ene-3-one were tentatively identified in the incubation mixt.

L5 ANSWER 3 OF 3 CAPLUS COPYRIGHT 2003 ACS on STN

AB One of the unidentified substances (AAE-I-AI) found by Salhanick and Berliner (C.A. 51, 18264f) in a feminizing adrenal tumor, is 3-indolecarboxaldehyde. 3-Indolecarboxaldehyde was also detected in normal pancreas and spleen and in the photoproducts of 3-indoleacetic acid.
